

High-purity Solvent Packaging and Dispense

Protect your product quality and integrity with IPI's well-proven packaging and dispensing systems!

IPI brings you a wide range of **safe, cost effective solutions** for solvent packaging and dispense. **We supply many of the market leading solvent and laboratory equipment providers.** The sealed, stainless steel container system effectively addresses the problem of storing and dispensing large volumes of high purity solvents.

- ◆ **Stainless steel containers from 10 – 1000 litres** from world renowned Schaefer GmbH.
- ◆ Containers fitted with necessary necks for existing fittings to meet your current specification for dispense equipment.
- ◆ Containers fitted with the **Macro Valve dispensing system from Micro-Matic**, available with a range of seal materials for reagent grade to **high purity solvents**. Alternatively the MacroValve system can be supplied for installation into existing containers.
- ◆ **Stainless steel containers can be customized** with your company logo printed on the top chimb of the container.

Application

Suitable for a wide range of solvents:

Acetone, acetonitrile, ethanol, methanol, methylene chloride, tetrahydrofuran, xylene etc.

Available as stand alone dispense systems or as part of an existing dispense or solvent purification system as supplied to hospitals and laboratories worldwide.

Key benefits

- ◆ Enhanced safety in solvent handling.
- ◆ Ease of handling, container changeover.
- ◆ Security and protection of product integrity.
- ◆ Enables inert gas dispense.
- ◆ Reduced storage space requirement.
- ◆ Reduced waste disposal costs – solid and liquid.
- ◆ Reusable for many years.
